Art Unit: 1644

DETAILED ACTION

Page 2

1. Applicant's amendment, remarks, and IDS submitted 2/20/07 are acknowledged.

- 2. Claims 16-18, 37, 41, and 42 are pending and are being acted upon.
- 3. In view of Applicant's amendment and remarks the previous rejections under the first paragraph of 35 U.S.C. 112 and 35 U.S.C. 102(b) have been withdrawn.
- 4. Applicant has claimed the benefit of priority of Australia PN 1239/95 and Australia PN 5172/95. Said benefit of priority is denied. The documents do not teach the specific assay of the instant claims, i.e., an assay employing the peptides of the instant claims. Specifically, the priority documents do not teach the use of a peptide of Claim 16 consisting of X_1 and X_3 consisting of 0-15 amino acids or 10 to 100 amino acids, nor the X_2 of Claims 16 and 37 (note the n_2 of about 10 to about 100 requirement of the peptide of the priority documents). Accordingly, the priority date of the instant application is the filing date of PCT/AU/0085, 2/20/96.

Applicant argues that PN 1239/95 teaches X_2 at page 2, line 23 and page 3, line 3.

A review of the document fails to reveal the limitation of n_2 being 1 (which would be required for the X_2 of the priority document to be the X_2 of the instant claims). It is noted that Applicant offers no support for the X_1 and X_2 of the claims in PN 1239/95 nor PN 5172/95.

- 5. The following are new grounds of rejection.
- 6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
 e) the invention was described in-
- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for

Art Unit: 1644

patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

7. Claims 16-18, 37, 41, and 42 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,509,165.

The '165 patent teaches a method of contacting T cells isolated from blood with SEQ ID NO:1 (SEQ ID NO:4 in the reference) and measuring T cell reactivity employing a proliferation assay (see particularly Column 5 line 15 - Column 4, line 32).

The reference clearly anticipates the claimed invention.

- 8. No claim is allowed.
- 9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Gerald Ewoldt whose telephone number is (571) 272-0843. The examiner can normally be reached Monday through Thursday from 7:30 am to 5:30 pm. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (571) 272-0841.
- 10. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
